KANN PRINT

Product Material Information

This product is 100%* made from PLA (Polylactic Acid),
a high-quality, 3D-printed material chosen for its safety,
sustainability, and durability.

Non-Toxic: PLA is a non-toxic material,
ensuring safe use for you and your family.

Food Safe: PLA is naturally food safe,
meaning this product is suitable for direct contact with food items.

Eco-Friendly: PLA is a biodegradable, plant-based material,
which decomposes under the right industrial composting conditions.
This makes it a sustainable choice for those who care about
reducing their environmental impact.

*Excluding double-sided tape

Installation Steps for Philips Hue Motion Sensor Built-in Box

1. Prepare Installation Area
Measure and mark a square (62mm x 62mm) on the wall or desired surface.
Cut this section out to create a space for the built-in box.

62mm

62mm
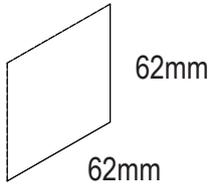

2. Position Built-in Box
Remove the protective film from the double-sided tape on the back of the built-in box.
Align and firmly press the built-in box into the prepared hole.
Optional: For added stability, secure the box with screws using the available
screw holes (screws not included).

This side under
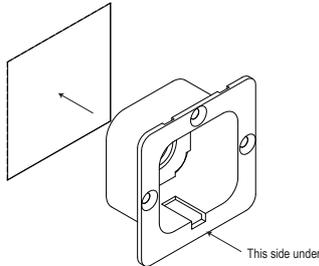

3. Attach the Motion Sensor Magnet
Use the magnet included with the Philips Hue motion sensor, and attach it inside the built-in box.

PH2

Philips logo on top, no spacer needed

Philips Hue logo on top, included 3mm spacer is needed.
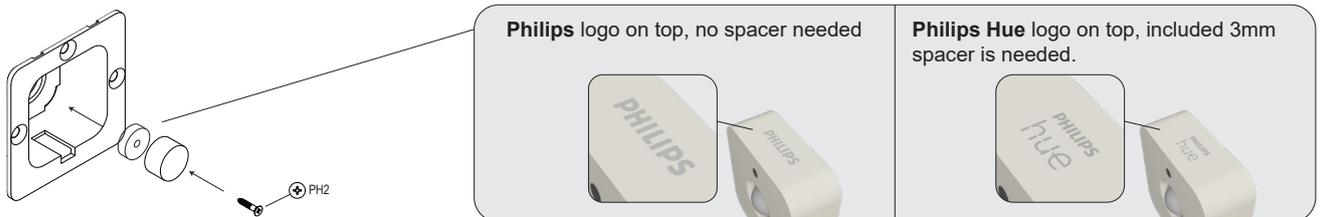

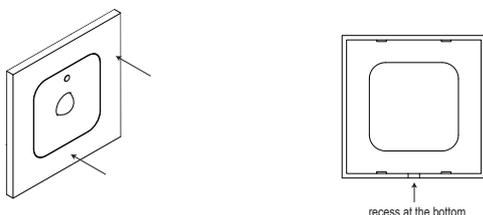

4. Install the Philips Hue Motion Sensor
Place the Philips Hue motion sensor into the built-in box, aligning it with the magnet.
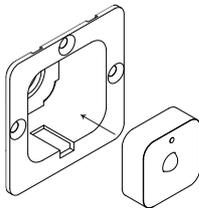

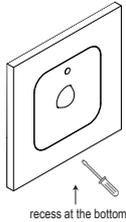

5. Attach the Cover
Place the included cover over the box for a seamless, finished look.
